

## CARBON DEFEATS THREE HILLS CLUB

Ten players from the Three Hills Tennis Club journeyed to Carbon on May 3rd to play a match with the Carbon Lawn Tennis Club. The result was a win for Carbon by five events to two. The Three Hills Club made excellent showing in all the events, and with a little more tournament experience will be hard to beat. We understand that this was their first inter-town match.

The following are the results and scores of the games:

**Men's Singles**—W. Edwards of Carbon defeated K. Young of Three Hills 5-6, 6-1, 6-1. Bruce Ramsay of Carbon defeated J. Ellis of Three Hills 6-5, 6-0.

**Ladies' Singles**—Miss Colburn, Three Hills, defeated Miss K. Ramsay of Carbon 5-6, 6-1, 6-1.

**Men's Doubles**—J. MacDonald and J. Spence of Carbon defeated K. Young and F. McLaren of Three Hills 6-1, 5-6, 6-1.

V. Hawkins and J. Fairbairn of Carbon defeated Sinke and Hollonquist of Three Hills 6-3, 6-4.

**Ladies' Doubles**—Miss I. Nash and Miss N. Hemming of Carbon defeated Misses K. and L. Kahlfleisch of Three Hills 5-6, 6-3, 6-1.

**Mixed Doubles**—D. Rennie and Miss Bohay of Three Hills defeated Chas. Nash and Mrs. Willson of Carbon, 6-5, 6-3.

After the games the Carbon Club served lunch and a short address of welcome was given to the visitors by the Carbon secretary, W.A. Braisher, and replied to by Messrs. K. Young and F. McLaren of Three Hills.

### ALBERTA'S DRIVERS NUMBER 165,000

Alberta has 165,000 licensed automobile drivers, according to figures issued recently by E. Trowbridge, Deputy Provincial Secretary. Since the first of the year, the number has been increased by approximately 2,500.

Under the Alberta system, a driver's license remains in force at the pleasure of the government, and is not renewable from year to year. It may be suspended or cancelled, however, in such cases as when the driver is found to have violated the Motor Vehicles Act.

Up to April 1, there has been 65,000 motor car licenses issued in Alberta. It was expected by officials that the number would increase rapidly during the month of April. Many car owners who have not had their machines in use since fall are now obtaining licenses to put their cars in operation.

There were over 100,000 car licenses issued in Alberta last year, and it is confidently expected that the number will be exceeded for the current season.

The new dam to be constructed for the Gleichen irrigation system, will hold back quite a bit of water and engineers estimate that it will form a lake of some six acres in extent.

### OUTFITS OWE CONTRACTOR

The following schedule for highway work has been proposed by the contractors who are handling the work from Munson through to Hanna:

30 cents per hour for labor; 60 cents per hour for man and 4-horse outfit. Board: \$1.50 per day for team; \$3 per day for 4-horse outfit; \$1.20 for men.

With the 8-hour days imposed, a man with a 4-horse team would owe the contractor 60c at the end of the week if he worked full time.

—Hanna Herald

## FIRST FORTNIGHTLY GOVT. CROP REPORT

Crop correspondents report that from 40 to 75 per cent of the wheat is sown. In those parts of northern and western Alberta where moisture supplies are adequate for germination, seeding is progressing fairly rapidly. Other districts report that seeding is being delayed to a certain extent awaiting much needed moisture. About ten per cent of the oat crop is seeded.

There has been considerable soil drifting throughout the Province, but crop damage from this cause has not been serious to date. Very little seed was in the ground at the period of the greatest soil drifting. The high temperatures of the past few days has been favorable to rapid germination where moisture is sufficient and good stands are expected. In the eastern parts of Central and Southern Alberta the moisture supply is insufficient and uniform stands cannot be expected unless rains come early.

There is a tendency to decrease the area sown to wheat and increase the acreage of coarse grains and fodder crops. In the drier areas only well prepared land such as summerfallow is being sown to wheat. If dry conditions continue, a large part of the remaining area will be summerfallowed; otherwise coarse grains will be seeded. An increase in the area devoted to coarse grains and fodder crops will be necessary to provide for the increasing numbers of livestock being kept.

Steps taken by the Dominion and Provincial Governments and Municipalities to provide seed grain in areas where there was a crop failure last year have been adequate to the need. All districts report a sufficient supply of good seed.

There are isolated instances where difficulty has been experienced in obtaining finances for the purchase of tractor fuel. In the majority of cases horses are available, and while tractors will be used less than formerly, this will not result in curtailing the crop acreage to any extent.

The mild weather of the past winter has been favorable to livestock and they are reported to be in good condition. Spring litters of pigs are satisfactory both in numbers and in vigour. Losses occurred during the cold weather of March. These losses have not been greater than usual however. Reports indicate that there is a material increase in the hog population over previous years.

## FUNERAL OF LATE MRS. G. WATSON

Funeral services of the late Mrs. G. Watson, who died on Saturday, April 25th at the home of her parents, Mr. and Mrs. A. G. Anderson, were held at the family residence on Tuesday, April 28th. The pall bearers were Messrs. Richard Garrett, Jack Garrett, Royal Hay, Henry Irwin, Fred McCracken and Irvin McCracken. Interment was made in the Carbon cemetery.

The late Mrs. Watson (nee Effie Anderson) was born in Forest City, Iowa, on June 12, 1903 and with her parents moved to this country in 1907. In 1911 they moved to the Carbon district and have since resided in the vicinity. In 1925 the deceased was married to Mr. G. Watson and they moved to the coast to live. In 1927 Mr. and Mrs. Watson returned to Carbon for a year, and again went to the coast, to live. About six weeks ago, Mrs. Watson, ailing in health, returned to the home of her parents, where she finally came to her death.

## ALBERTA NEWS

Olds suffered a \$30,000 loss last Saturday when fire destroyed the two-story McKercher implement warehouse a residence, and a one-story school building; also \$15,000 worth of machinery.

Seeding is proceeding rapidly in the Bassano district.

It is reported that British capital is considering the possibilities of establishing a sugar beet factory at Vauxhall, Alberta.

With millions of feet of timber already destroyed by dozens of fires in the north, and the entire central part of the province being blanketed by a pall of smoke all last week, the fire situation was described as the worst in years.

A battalion of policemen of about 90 men, broke up a Communist May Day demonstration in Calgary and arrested seven men, when a crowd of 1,000 attempted to leave a vacant lot carrying banners.

The number of Normal Students in Alberta next term is to be limited to 700. The age limit has been set at 18, and those students having their grade 12 or some grade 12 subjects will be given the preference.

## Southern News

Mr. and Mrs. Jacob Buyer motored to Calgary on Saturday and returned the same day.

Mr. and Mrs. Ed. Schell were visiting with relatives in Trochu over the week end.

Mr. and Mrs. Sam Ohlhauser and children, and Miss Emma Schmidt, went to Hanna on Sunday and visited with Mr. and Mrs. R. Neubauer. They returned on Monday and Miss Lilly Neubauer came with them and is now visiting with her sister, Mrs. Emil Metzger.

Mrs. Gust. Bitz had the misfortune to turn over her car this week. Besides herself were all the children, but no one was hurt. Considerable damage however, was done to the car.

Mr. Ralph Kaehn is busy drilling a well on Mr. George Marshman's farm.

Mr. H.G. Kary purchased a 1926 model Dodge coupe when he was in Calgary last week.

Dorothy, the little daughter of a tire salesman, had seen triplets for the first time.

"Oh, mother," she cried on returning home, "What do you think I saw today?"

"I can't imagine dear. What?"

"A lady that had twins—and a spare!"

### THE CHAUTAUQUA MEETING

A meeting of the guarantors of the Carbon Chautauqua was held in the Municipal office on Friday evening last. It was decided that the Chautauqua contract would have to be carried out and it was the unanimous opinion of the meeting that the guarantee could be met if all co-operated to the fullest extent.

## GARLAND'S SPEECH IN HOUSE APRIL 20

Mr. Garland, M.P. for this constituency has been raked over the coals a great deal lately, on account of his speech in the House of Commons on April 20th, in which he is said to have greatly exaggerated the poverty and suffering of the West. Whether or not Mr. Garland has greatly exaggerated the conditions has not been proved, and rightly or wrongly, he has at least brought his point of view before the people of Canada. The following is a part of Mr. Garland's speech which was printed in Hansard, and our readers can judge for themselves whether or not Mr. Garland has exaggerated conditions.

"Much has been said about agricultural conditions and the depression in agriculture. I intend to refer to this later, but first I feel it my duty to deal with another problem which is also of interest to my constituency. We have thousands of miners who are dependent on the coal industry. The conditions in those districts this year were positively deplorable. I could if I would, but I have no desire to do so, harrow the very heart of every man in woman in this house with actual stories of the misery and suffering that these people have had to endure as a result of the conditions under which they are now placed, because of unemployment. I could tell them of children fainting in school for lack of food, of men who dropped over in the streets because they had given everything they had to their families. I could tell them of men without a day's employment for months on end, and without a cent of income. I could also point out that these municipalities in many cases are so poverty stricken as the result of long-continued depression in the industry that they are not even in a position to co-operate with the federal and provincial governments in providing the direct relief necessary. I have in my hand a letter from one of those districts, the Rosedale district, in which there was temporary employment this year. I am informed that this letter was written following a meeting of the Rosedale local of the United Mine Workers of America, in full session of 310 members. They respectfully wish to bring to my attention the fact that they have had only twenty-six day's work in three months. Only twenty-six day's work in three months, and only a part of the population actually working. The letter continues:

"We are sadly in need of work of such a nature as will enable us to carry on. Partial relief together with the odd day's work in the mines would keep us going. This of course does not include the Star mine of about 150 miners, who are in a similar position."

"We heard much during the last election campaign of a fuel policy. I have waited patiently for some pronouncement from the ministry, either during the recess since September or

## GOLF PLAYOFFS TO COMMENCE MAY 17

Word was received this week that the playoffs in District 15, for the Herald Trophy will commence on May 17th this year. Denny Howell of Irricana, the convener of District 15, announces that this is the latest that these games can commence in order to have the playoffs completed by the specified time of July 1st.

The following is the schedule of play as outlined:

May 17—Irricana at Carbon  
May 31—Carbon at Trochu  
June 7—Trochu at Irricana  
June 14—Carbon at Irricana  
June 21—Trochu at Carbon  
June 28—Irricana at Trochu

These games are all scheduled to commence at 11 a.m. sharp and each club will play 54 holes of golf in all.

during this session, with respect to that matter. None is forthcoming. I do not know what the government is going to offer to the coal industry in Canada, but I am almost despairing of any action because the right hon. the Prime Minister on his return from England gave an interview to the press which I find reported in the Calgary Albertan of January 23rd last, as follows:

"The working out of a national fuel policy is an easier matter on paper than in actual practice. His own view was that the fuel problem would probably be solved by chemists and scientists."

"What a ghastly come-down from the brave words spoken at the time of the election! Then all that was necessary was to elect the right hon. gentleman and his party, whereupon at once some mysterious and magic fuel policy would emerge that would rehabilitate the industry, give it full working time and ensure its progressive growth. On top of that my hon. friend the Minister of Mines (Mr. Gordon) quite intelligently but quite depressingly made a speech in Toronto on February 16th in which he intimated, by implication at least, that because of the tremendous cost of moving coal from the west down to the central provinces where it is required—\$3,000,000 annually—the difficulty was apparent. I agree with the hon. minister, but that does not absolve the administration from the responsibility placed upon it in connection with the opening up of all these mines and permitting the over-capitalization and over-expansion of the industry without regard for markets. However, that is a problem this government has inherited; I wish them well and will give them all the co-operation I can in its solution.

"Now, Mr. Speaker, I wish to make one further remark in connection with the local situation. Hon. gentlemen opposite are sometimes inclined to discount some of the descriptions of conditions recounted by hon. members in this corner of the house. Particularly do I notice their injections and expressions of disgust, at least of disapproval, of the utterance of my hon. friends in the Labour group. It is claimed that even I exaggerate at times.

"Some hon. members: 'No, no.' "Mr. Garland (Bow River): 'I do not see how anybody could exaggerate existing conditions. The English language does not provide words which could exaggerate them.' "

# GAS relieved

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips'. Look for the name Phillips on the bottle. All drugstores sell it—50c.

## The Canadian Constitution

Is the constitution of the Dominion of Canada, being the British North America Act, 1867, out of date?

Recent decisions by the higher Provincial courts of law, the Supreme Court of Canada, and the Privy Council all give point to the question.

In other words, is a hard and fast written constitution drafted in the eighteen-sixties of the nineteenth century, long before the days of the automobile, radio, airplanes, and modern big business suitable to our present twentieth century needs? Nay more, is the present distribution of powers and authority as between the Dominion Parliament on the one hand, and the various Provincial Legislatures on the other, the best arrangement under which to carry on our public business today, not to mention possibly even more complicated developments in the years to come?

Unlike Great Britain, which has no written constitution but is governed by a Parliament guided by precedent built upon precedent down through the ages, and which is, therefore, free to meet changing conditions as they change, Canada is bound by a formal document.

Furthermore, among all the self-governing Dominions of the Empire, Canada alone does not possess the power to amend its own constitution. That power rests solely with the Parliament of Great Britain.

The constitution of Canada was drafted just as the great American civil war was drawing to a close, and the Fathers of Confederation had ever in mind the conflict which arose in the republic to the south between the Federal authority and the advocates of State rights. The constitution of the United States is founded in the principle of State rights, and the Federal Government has authority in regard only to those matters specifically delegated to that Government. Where no specific delegation of authority as between the Federal and State authorities is made, then the authority automatically rests with the State. The Civil War resulted from the contention of the southern states that the Federal authority was interfering with and usurping certain of their State rights.

The Fathers of Confederation consequently drafted the B.N.A. Act on exactly the opposite principle. In Canada, the rights and powers of the Provinces are distinctly set forth and limited, and all matters not so specifically stated belong of right to the Dominion.

There are, however, certain subjects in regard to which authority is divided, as, for example, incorporation of companies. The Provinces possess the power to incorporate companies for purely Provincial purposes, while the Dominion can incorporate for Dominion purposes. Both are intensely jealous of their rights in this respect, and, as a result, there is continual dispute. For example, most Provinces are anxious to curb the stock-selling activities of corporations, and to bring them under strict government supervision and control. They have, therefore, enacted what are commonly termed "blue-sky" laws. But the Dominion has contended that such laws cannot apply to Dominion incorporated companies. The result is that any company desirous of evading such Provincial restrictions takes out a Dominion charter.

There has now arisen a dispute between the Dominion and the Provinces as to which authority can exercise control over radio broadcasting and reception. The Dominion has exercised that right to date, but it is now challenged by the Provinces. Suppose it should be established by a Privy Council decision that the Provinces are in the right and the Dominion wrong, under the old B.N.A. Act, would it be a good thing for Canada to have radio control cut up into nine pieces?

As a matter of fact, in a country of immense distances, divided by natural geographical barriers, is it not one of the handicaps of our national life that, in regard to many matters, lack of unity results because of Provincial jurisdiction in such matters which would be overcome through unified Dominion control?

On the other hand, there is the tendency on the part of Ottawa to take control over, or interfere with, subjects which are clearly matters for the Provinces. Constitutionally speaking, such a matter as Old Age Pensions belongs to the Provinces, but by enactment the Dominion Parliament decreed that it would contribute a certain proportion of such pensions if the Provinces adopted the plan. Some of the Provinces have done so; others have not. Such a pension system once established by a Province cannot easily be done away with, but there is nothing to prevent the Dominion Parliament from repealing its enactment at any time, thus leaving the Provinces to face the whole of the financial burden. Similar action has been taken at times by the Dominion in such matters as highways construction, technical education, and grants for this and that. Provinces have embarked on these enterprises, only to have Dominion assistance withdrawn later, to the financial embarrassment of the Provinces.

The question that naturally arises is: Has the time not arrived when the constitution of Canada should be overhauled and brought up-to-date? Should not representatives of the Dominion and of the nine Provinces meet in conference and consider the whole subject with a view to clarifying the atmosphere and removing so many of the causes of present constitutional cases before the courts? And is Canada not just as capable of amending its own constitution as is Australia, South Africa, or the Irish Free State? Or must we remain in the eyes of the rest of the world as an inferior Dominion?

## Suffered From Heart Trouble

Became Weak and Run Down

Mrs. Wm. Dlotte, Glensandfield, Ont., writes:—"For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

## Alberta Railways Act

Measure To Extend Time For Two Years For Completion Of Northern Road

Third reading was given in the House of Commons to a bill respecting the Northern Alberta Railways Act.

The object of the measure is to extend the time for two years for the commencement and completion of the main line of the Edmonton, Dunvegan and British Columbia railway from Spirit River, Alberta, "by the most feasible route and in a generally westerly direction of a distance of 102 miles, more or less, to a point in townships 78 or 79, range 18, west of the sixth meridian in British Columbia"; and for a branch line of the Central Canada Railway from near Grimshaw, Alberta, in a northerly direction to the northern boundary of Alberta.

## FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I hit on this plan. I dropped the hems; and as the part that had been turned under was darker than the rest, I redyed the entire dress, after having bleached the goods, following directions in the Diamond Dyes package."

"I used Diamond Dyes for the redyeing, of course. I have dyed many things with these wonderful colors. They have saved me many dollars and have never failed to give perfect results—smooth, even colors—fast to wear and washing. Friends think my things are new when I redye or tint them with Diamond Dyes. They do give the most gorgeous colors!"

Mrs. G. C. Levis, Quebec.

## The Cutworm Menace

Pale Western Cutworm Eggs Are Hatching In Infested Areas

A recent examination of fields in the area expected to be infested with pale western cutworm has shown that in some cases the eggs are beginning to hatch. This is especially true in the areas that have recently been visited with light rains or snow followed by warm weather.

The hatching of these eggs at this time will answer the question that has been in the minds of many farmers regarding the effect of the open winter on the pale western cutworm. There seems to have been a general impression among the people in the infested areas that the peculiar winter would effectively control the cutworm. This was to be accomplished either by the eggs being killed or the eggs hatching during the winter and the cutworms being killed. There is very little evidence from experimental work to show that either is possible.

The presence of pale western cutworms in the field can be easily determined in those fields which have some vegetation such as wild oats, volunteer grains, grasses or weeds present. The young cutworms feeding on this vegetation will eat holes in the leaves and some leaves may be cut off above the ground. The evidence of feeding is much easier to find than the cutworms themselves since they are at present very small and inconspicuous.

Fields which have such vegetation showing signs of cutworm feeding can not be seeded to crop with any hope of having it mature unless the season turns out to be exceptionally wet. Such fields might better be cultivated thoroughly and worked up as first class summer fallow for next season. Where this land cannot possibly be spared for summer fallow it should be cultivated thoroughly throughout the early spring and seeded to late barley or oats after the middle of June. The date of this seeding will depend on whether or not cutworms are still active in numbers in the field.

Information regarding the pale western cutworm may be obtained by writing to the Dominion Entomological Laboratories at Lethbridge, Alberta; Saskatoon, or Indian Head, Saskatchewan; Treesbank, Manitoba; to the University of Alberta at Edmonton; the University of Saskatchewan at Saskatoon; or the Provincial Departments of Agriculture at Regina or Edmonton.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

### Presented With Horses

Mounted Policemen At Empire Trade Fair At Buenos Aires Receive Gift

Four Royal Canadian Mounted policemen now on duty in the Canadian pavilion at the British Empire trade fair in Buenos Aires, have each been presented with two riding horses for their personal use. A cable to this effect, received at the Department of Trade and Commerce from Buenos Aires, does not make known the donor of this munificent gift but it is believed the eight horses were presented by the Argentine government.

The four members of the R.C.M.P. sent to the trade fair are: Sergt. J. R. Paton, M.C., of Victoria, B.C.; Constable Carstairs, of Medicine Hat, Alberta; Constable Carmichael, and Constable C. G. Fairman, both of Ottawa.

Previous reports from Buenos Aires said the four "Mounties" had captured the popular fancy in Argentine, a country noted for its horsemen.

### Awarded Research Council Bursary

Miss Edith May Lyons, of the department of zoology, University of Manitoba, has been awarded a bursary by the National Research Council of Canada. Miss Lyons is qualifying for her master of science degree this spring, and will continue with post-graduate research work at the University of Toronto next year.

Sweden's railway electrification programme is expected to prevent a national unemployment problem for at least two years.

### Deplores Child Labor

Says Canada Not Fulfilling Provisions Of Versailles Treaty

Charges that Canada was not fulfilling provisions to protect labor, as laid down in the Versailles treaty, were made last night by J. S. Woods, Labor M.P. for Winnipeg North Centre, at the annual meeting of the League of Nations Society at Toronto.

Clauses covering an eight-hour day, minimum wages commensurate with the living standards of the country in which the worker lives, elimination of child labor and the right of labor to organize, had not been lived up to, he claimed.

According to the census, he said, Canada employed almost twice as many children as the United States. Of every 1,000 persons engaging in gainful occupations, 23 were under the age of 16, while in the United States only 13 under 16 years were employed per 1,000.

### B.C. Peach Culture

It is expected that about 20,000 new peach trees will be planted in the Oliver district of British Columbia this year.

# May Harness Natural Gas Going To Waste In Turner Valley To Generate Electric Power

Millions of feet of natural gas now going to waste every day in the Turner Valley, Alberta, may be harnessed to generate electric power for industrial and domestic purposes. A proposal to do this has been submitted to the Alberta Government by a British corporation, according to press reports. It is stated that the corporation offers to spend \$10,000,000 on the project at the outset and a total of \$100,000,000 within 15 years and to begin work on the construction of a plant within 90 days from the time the approval of the Alberta Government is given to the proposal. The plant will be capable of generating 70,000 horse power of electricity withing a year.

The plan for this new project, as outlined, is to collect the waste gas in Turner Valley into one pipe line running to the power house where it would be used to turn specially-designed turbine wheels for the generation of electrical power for which a market would be secured in industrialization of southern Alberta. The power house would be located at a point probably 30 miles east of Turner Valley and it would not depend alone on gas from Turner Valley but would utilize also gas from other fields. The corporation proposes, it is stated, to offer the electric power generated for sale in the provinces of Manitoba, Saskatchewan, Alberta and British Columbia, and also in the border states of the United States. The Government of Alberta is asked to pass legislation compelling all oil companies or individuals, whose gas is escaping and not being put to use, to supply the corporation with such gas at a price to be fixed through the Public Utilities Board. In consideration for the establishment of such a plant as proposed, an exclusive franchise for a period of 99 years to the corporation is requested. Provision would be made, if desired, for the Alberta Government to take over the plant on an equitable basis at some time in the future.

The scheme for utilization of the Turner Valley and other waste natural gas would produce electric power at a cost of about three-tenths of a cent per kilowatt-hour.

## Increase In Poultry

Value Of All Poultry In Canada Placed At Fifty-Four Million Dollars

Poultry keeping is on the increase in Canada. The total number of poultry on the farms in the Dominion at the end of last year was estimated at 60,795,000, of which 56,247,000 were hens and chickens; 2,399,000 turkeys; 1,160,000 geese and 989,000 ducks. The value of all these birds is placed at \$54,852,000. Two years ago the total number of poultry was 53,779,000. Poultry are successfully raised commercially in all of the provinces of Canada. The principal centre of the industry is the Province of Ontario.

## A Quick Thinker

Farm Labourer, to hik@roscglnre  
Farm labourer, to hiker crossing a field: "Didn't you see the notice saying pedestrians ain't allowed here?"  
Hiker (with great presence of mind): "I'm not a pedestrian. I'm a Congregationalist!"  
Labourer: "Oh, that's different. You can go on."

Manager: "I have just signed a contract for you to appear against Smith."  
Champion: "I can't box him—we are enemies."—Buen Humor, Madrid.

## Saskatchewan Coal Mining

New Regulations Governing Leases Are Made Public

Reduction in the maximum, and increase in the minimum area allotted to any one lessee is provided for in the new coal mining regulations as published in the April 18 issue of the Saskatchewan Gazette.

Under the old Dominion government regulations the maximum area allowed was 2,560 acres, while the minimum was 20 acres. Only one location was allowed to any one person.

The new regulations provide for a maximum area of 640 acres in any one location, but provide for three locations to a person. Thus the total area provided for under the new scheme is 1,920 acres. The minimum size of a location is 40 acres.

There are little other changes in the regulations, except that under the present plans, any lessee must have a clear sheet with the department before he can obtain a new location or have an assignment registered.

## Did Not Choose To Speak

A young woman who wished to engage Calvin Coolidge in conversation, when he was president, told Mr. Coolidge that her father had laid a wager that she couldn't get him to utter three words. She expected that this would start him talking. But he said quietly: "Dad wins!"

## FARM MANAGER

A. R. Judson, who is farm manager of the Dauphin zone for the Canada Farm Finance Corporation.

## Blind Will Benefit By New Invention

Instrument Produces Raised Letters From Ordinary Pages

Robert E. Naumburg, of Cambridge, Mass., has demonstrated for the first time a "printing visagraph," an instrument that produces magnified, raised letters from the pages of ordinary books.

The visagraph reproduces large, embossed letters on a wide roll of thin aluminum foil, with the result that the finished product corresponds in some respects to the Braille system. Naumburg estimates his machine will increase the reading range of the blind a thousand-fold.

# National Research Council Investigates Problem Of Effective Vaccine Against Tuberculosis

## Preparing Attractive Display

Quebec Is Taking Large Space At World Grain Show

His Excellency the Governor-General has consented to act as chief patron of the world grain exhibition and conference which will take place at Regina in the summer of 1932.

One of the most attractive displays in the educational section of the exhibition will be that from the Province of Quebec. It has been decided to take a space of 200 feet frontage in the Exhibition building in order to give the thousands of visitors an idea of the agricultural activities of Quebec.

The centre feature of the exhibit will be a Quebec farm, complete with buildings, live stock, fields, sugar bushes, etc., flanked on either side with exhibits of natural resources of the province, including mineral, lumber, power development, handicraft and manufacturing products.

Argentina is the sixteenth country to officially accept the invitation of the Canadian Government to attend the Exhibition and Conference. The complete list of participants at present is as follows: Italy, Peru, Yugoslavia, Guatemala, New Zealand, Czechoslovakia, The Netherlands, Belgium, Poland, Siam, India, Portugal, Switzerland, Estonia, The Philippine Islands and Argentina.

## No Hearsay Evidence

Court Case That Was Settled In Common Sense Way

It is well to see things done in a sensible way. To illustrate: In an Eastern city there was a queer case in court. One farmer claimed that a fire started in the bush by his neighbor, had spread to his property and had spoiled the land by burning off the top part of the soil.

Instead of arguing for days, officials, solicitors, and witnesses, took a trip out to the property in question, an' along with them they had spades and shovels. They actually went to work and gouged holes in the ground to see if the damage was as serious as claimed, and to find out exactly what had taken place. Returning to court, the decision was made that the fire damage claim had not been sustained.

That was direct action and common sense.

## Not Looking For Miracles

Western Farmers Will Fight Way Back To Prosperity

"Twenty-five years from now we will be growing a good deal more wheat than today, and selling it in the world markets," said Hon. Duncan Marshall, one-time minister of agriculture in the Alberta Government, addressing the Eastern Canada Livestock Union at Toronto.

"Taken as a whole, I can say to you that the farmers in the Canadian West are not looking for any miracle to happen, or anybody to turn the country's economics upside down. They are going to win through to better days, as they have fought through earlier depressions," he declared. Mr. Marshall had just returned from a month's motor tour through the West.

## Measurements Accurate

Geodetic Survey Of Canada Made By Line and Triangles

Accurate measurements can be made across country by means of a measured line on the ground and a system of triangles. The triangulation of the Geodetic Survey of Canada, Department of the Interior, is conducted with the greatest degree of accuracy. Its usage involves the determination of the size and shape of the earth, the location of international and provincial boundaries, and furnishes points of control for the general maps of the country. Adjusted geodetic points in great numbers are available to the public in every province of the Dominion.

The American golden plover, which breeds in Arctic America, migrates the entire length of North and South America, wintering in Patagonia.

"According to the committee of the National Research Council on tuberculosis research, much work remains to be done before the problems of an effective vaccine against tuberculosis are solved."

This statement was issued following an important conference on the subject in Ottawa, in which the leading doctors specializing in the study of tuberculosis took part.

The statement sets forth that the committee agrees "B.C.G." confers a degree of resistance to tuberculosis but the nature and extent has not been clearly demonstrated. Further studies are to be conducted to clear up these points definitely. About 1,000,000 infants have been vaccinated against tuberculosis. "B.C.G." is the vaccine of the Pasteur Institute of Paris.

The statement describes the work accomplished as follows: "B.C.G." (named after Prof. B. Calmette, the director of the Pasteur Institute and his colleague, Guérin), has to date been used in various countries to vaccinate a total of approximately 1,000,000 infants against tuberculosis. In the effort against bovine tuberculosis it has been put forward as a preventive measure that would eventually make unnecessary the expensive method now commonly employed of destroying animals reacting to the tuberculosis tests.

"Canadian researches on tuberculosis have been widely discussed in both Europe and America, particularly those of Dr. E. A. Watson, of the animal diseases research station, Dominion Department of Agriculture, at Hull, Que., who has challenged claims put forward by Calmette; Dr. A. C. Rankin, of the University of Alberta, and Dr. J. A. Baudoin, of the University of Montreal, whose work has tended to support Calmette's contentions, and Dr. G. B. Reed, of Queen's University. Dr. Watson and Dr. Rankin have carried on extensive experiments with cattle, and Dr. Baudoin has supervised the inoculation and study of infants in Montreal.

"Dr. Reed has recently made an important contribution to the knowledge on the subject and will publish his results shortly."

Dr. R. S. Ferguson, director of the Fort Qu'Appelle, Sanatorium, Fort San, Sask., reported on the tuberculosis investigation that has been carried on under the auspices of the committee among the Indians of that district. He said that a family history of the Indians showed that within three generations there had been deaths from tuberculosis in nearly every family on the reserve. The worst tuberculosis epidemic was between the years 1880 and 1905. To indicate the effectiveness of the work that was now being done, Dr. Ferguson reported that, while the incidence of tuberculosis among the Indians in 1928 was twenty times that of the surrounding white population, it was today only thirteen times, a reduction of one-third during that period.

Dr. H. M. Tory presided at the conference and 25 men and women engaged in the study of the disease took part.

## Grist Mill For Moose Jaw

Western Grist Mills Limited of Moose Jaw has started the erection of a 100 barrel mill and expects having it completed in time to handle the 1931 crop.

"Do I know the business? Rather. I was very useful in the last place—it was I who used to call out to the others, 'Hush! Here comes the boss.'" —Pages Gales, Yverdon.

## FASHION

No. 273—For Smart Matron. This style is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 4 1/4 yards of 39-inch material with 3/4 yard of 10-inch lace and 3/4 yard of 35-inch lining.

No. 232—Jacket Suit. This style is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust measure. Size 16 requires 3 3/4 yards of 39-inch material for jacket and skirt with 1 1/4 yards of 39-inch material for blouse and jacket bands.

No. 260—Expresses Good Taste. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 3/4 yards of 39-inch material.

No. 244—For Wee Maids. This style is designed in sizes 2, 4 and 6 years. Size 4 requires 1 1/4 yards of 39-inch material with 1 1/4 yards of binding.

No. 661—For Smart Junior. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/4

yards of 39-inch material with 3/4 yard of 39-inch contrasting.

Our large Fashion Magazine shows the latest Paris styles for Spring and Summer for adults and children. Also instructive lessons in sewing. Price of book 15 cents.

All patterns 25 cents in stamps or coin (coin preferred.) Wrap coin carefully.

## A Magic Soap

## How the Fairy Queen's Christening Gift Was Found

Once upon a time the Fairy Queen was asked to be God-Mother to a very important Baby Princess and wanted an especially nice Christening Gift. So she sent her five cleverest Elves to fly all over the world in search of wonderful scents and rare perfumes and rich oils for a magic soap that would make the Baby Princess as lovely as the day is long.

Well the first Elf flew to France, and Algeria, and Bulgaria, where the loveliest roses grew, and asked them to give their pretty frocks for the Magic Soap. And the roses showered their sweet petals into a big sack the Elf had brought with her, all ready to be crunched up and give a lovely perfume.

The second Elf flew to Africa, and there she made friends with the king's daughter, who gave her cloves and Veivert—that is a scented root—rather like our sweet grass.

And the third Elf went to India, and found Patchouli—a plant whose leaves smell something like mint, and the pretty yellow wood of the sandalwood tree, which is very fragrant.

But the fourth Elf had the most dangerous time, for she daringly flew to an island near Italy called Messina, where there lived some fierce fruit called Bergamots who were very nasty and disagreeable, but who nevertheless were exquisitely perfumed coats. The Elf crept up when the whole treefull were asleep and snipped off a bit of their coats here and there where it would not be missed—and was just tiptoeing away when a big fat Bergamot awoke and with a great yell prepared to fall on her and crush her. But the Elf called to the Flower Fairies to help her, and they seized her quickly and hid her beneath a toad-stool till the Bergamot had gone to sleep again when she scampered off home with her treasure.

On her way she met the fifth Elf who had clear golden cocoanut oil from Cochinchina, and sticky scented gums from the East Indies.

And when they all arrived back they found that the Palace Pussy Cat who wanted to help his mistress had been all the way to Abyssinia (that is Bible Story Land), to see a cousin of his, the Civit Cat, who carries a delicious perfume with him in a tiny bag and had gladly given it to Pussy; and Civit had kindly introduced the Fairy cat to a Chinese friend of his, the Musk Deer, who had some rare scent in a secret sack under his tummy which he also gave for the Christening Gift.

How pleased the Fairy Queen was! Quickly she carried all the marvelous things to a Mortal friend of hers who was a soap maker and he worked with his helpers day and night and produced the most wonderful soap he had ever made just in time for the Christening.

And the Princess grew up so beautiful that she married the richest and handsomest Prince that ever was, and on her wedding day when the Fairy Queen came to see her, she said: "Dear God-Mother, couldn't you ask your friend the Soap-Maker, to make heaps and heaps of my wonderful soap and give it to all the little folk and all the big folk in the world. I feel so selfish enjoying it all myself."

"That is a good kind God-Daughter," said the Fairy Queen—and she told the soap maker, who promised to do as the Princess wished.

And he went on making the Magic Soap all his life, and after that his son and his grandson went on making it. And do you know it is really your Baby's Own Soap, and it is because it is made of the perfume oils from all the wonderful things that the five Elves found all over the world that it smells so sweet and makes such heaps of fluffy creamy bubbles and helps little folk and big folk to grow as lovely as the day is long.

**Choked For Air.** Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. It has behind it years of success. It is the sure remedy for every sufferer.

## Aviators Thrill Spectators

## Exhibition Of Spectacular Parachute Jumping Staged At Ottawa

As nonchalantly as bathers taking a morning plunge, 12 officers and non-commissioned officers of the Royal Canadian Air Force recently tumbled into space from a height of 2,000 feet in one of the most spectacular exhibitions of parachute jumping ever staged in Canada. The display was remarkable in that every flier who went aloft completed what is probably the most hazardous part of the Air Force training with landings that were perfect or near perfect.

Of the dozen daring airmen who performed the feat, ten were negotiating their first parachute leap.

Pine forests that were a rich source of amber once spread over northern Europe.

## Let these 6 vital Salts rid you of PIMPLES

Would you like quickly to free yourself of those hideous pimples—those unsightly blackheads—and have that smooth and soft skin perfection you've always envied?

Do you want to have eyes as dazzling and bright as water dancing in a summer's sun?

Would you like to enjoy glorious health with plenty of energy and possess a keen mind?

Then take a quarter teaspoonful of Kruschen Salts in a glass of hot water every morning before breakfast!

Kruschen is a combination of the six vital salts which your nerves, glands and body organs ought daily to receive from food if they're to function correctly and which are impossible to obtain in these days of modern cooking.

Kruschen swiftly clears your blood of those harmful acids which cause your skin to erupt—you'll possess a skin like velvet, and a health perfection you didn't think possible!

## SUNDAY SCHOOL LESSON

MAY 10

## THE PARABLE OF THE POUNDS

Golden Text: "It is required in stewards, that a man be found faithful."—1 Corinthians 4:2.

Lesson: Luke 19:11-26.

Devotional Reading: Psalm 103:11-18.

## Explanations and Comments

The Reason For Giving the Parable, verse 11.—Jesus and His disciples were approaching Jerusalem, and many were expecting that His entry into the city would be an inauguration of the Messianic Kingdom. Jesus knew that He was going to a far country, but they supposed that the kingdom was immediately to appear. They looked for it to appear suddenly from the outside instead of gradually from within. "They focussed their attention on the fact that they were about to enter into a reward, while Jesus put the emphasis on the fact that they were about to enter a trust." Jesus gave this parable to warn those who wished Him to head a revolution and establish His kingdom by force that it would come only by patient faithfulness.

The Parable Of the Pounds, verses 12-26.—Jesus begins His parable with the statement that a certain nobleman went into a far country, to receive for himself a kingdom, and to return. Calling ten servants, he gave each a pound and bade them trade therewith till he returned. A mina, translated a pound, is equal to one hundred drachmas; a drachma was a coin worth about eight pence, or sixteen cents, R.V.M. The sum was small, about sixteen dollars, but it would test their faithfulness. In the similar parable of the talents different sums were entrusted to three men.

To these servants Jesus said, "Trade ye herewith till I come."

Wycliffe's Version reads "Merchandise till I come." The word "occupy" in the King James' Version at the time the translation was made had the meaning of "use."

On His return to judge the world (in the interpretation of the parable, the nobleman is Jesus Himself), he calls for a settlement with his servants, to learn how faithful they have been to their trust. The case of three, two faithful, and one unfaithful, is taken as typical of all. The first had gained ten pounds more, and is rewarded by being given authority over ten cities. The second had gained five pounds, and is placed over five cities. The third had done nothing.

"Life is God's sacramental gift To man for his emprising,— The talent given into his care For his soul's exercising,— A sacred trust bestowed on him For his immortalizing, And he who lends will one day ask His own again with interest; See to it then, lest thou be found Of those who failed him in the test."

—John Oxenham.

"Lord, here is thy pound," the third one said, "which I kept laid up in a napkin," and then he excused himself by accusing his lord of being an austere man who would require him to make up whatever loss there might be and would keep whatever profit he might make, so that he himself would be no better off for all his labor or trouble. "Thou takest up that which thou layest not down, and reapest that which thou didst not sow"; these were proverbial sayings applied to grasping persons.

**Persian Balm**—the perfect aid to beauty. Essential to real feminine distinction. Results always in the highest expression of beauty. Its use keeps the hands always soft and flawlessly white. Indispensable to the whole family. Imparts added charm to the mother. Serves the father as a hair fixative and cooling shaving lotion, and protects the tender skin of the child. Persian Balm is the true toilet requisite.

## Zeppelin May Visit Arctic

## Eckener Hopeful That Polar Flight Can Be Financed

Negotiations which have been carried on at Berlin between Dr. Hugo Eckener and various interested persons on a possible Zeppelin North Pole flight make the flight seem more likely than at any time heretofore, the Graf's veteran commander has intimated.

"Our great and only difficulty throughout," he said, "has been the question of financing the polar flight, but I am quite hopeful that this difficulty will be overcome."

**It Testifies For Itself.**—Dr. Thomas' Eclectric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself and needs no guarantees. This shows why this Oil is in general use.

**Quickly Ends Itch of ECZEMA**  
"SOOTH-SALVA" AMAZES MOTHER  
"My baby had a bad case of eczema. But as soon as I applied 'Sooth-Salva' he stopped scratching and crying. His skin soon cleared." — Mrs. J. Laurence.  
"Sooth-Salva" ends it at once. All druggists.

## Horsepower Going To Waste

## Electricity Could Be Produced At Grand Falls In Labrador

Four million horsepower of electricity was "going to waste" at Grand Falls, in Labrador, Sir Wilfred Grenfell, famous medical missionary to the coast of Labrador and Northern Newfoundland, declared during a lecture at Montreal. Sir Wilfred said he was attempting to demonstrate to governments that Labrador may be rich in minerals and other natural resources.

## ACTION TAKEN BY FRANCE WILL AID SALE OF WHEAT

Winnipeg, Man.—France's increase in the percentage of foreign wheat to be mixed with the domestic product will "help a little" in improving exportation of Canadian grain, according to A. P. White, president of the Winnipeg Grain Exchange. France, it is announced, increased the percentage of foreign wheat for mixing to 25 per cent., and Mr. White believed that this move would aid somewhat in decreasing the Canadian surplus but he expected no drastic rise in Canadian exports.

"Any removal of restrictions against foreign wheat on the continent tended to improve Canada's position," Mr. White stated. He also intimated that it would benefit other countries shipping wheat to France. He was unable to state whether the increase in the percentage of foreign wheat for mixing, made by France several weeks ago, had caused any undue jump in Canadian shipments to that country, but he believed the jump to 25 per cent. was bound to relieve the situation in this country slightly.

"Germany," Mr. White revealed, "is at present contemplating the lowering of her tariff against foreign wheat which would add further in the clearing of Canada's surplus." The European countries, he said, will shortly come into the market for wheat, resulting in a lowering of all tariffs and an increased demand for the Dominion's product.

John I. McFarland, general manager of the Central Selling Agency of the Wheat Pool, believed France's action gave a brighter outlook for the removal of Canada's surplus. Several weeks ago, he said, France increased the percentage and it caused an improvement in export. "The raise to 25 per cent," he added, "will be welcomed."

## Firmer Hand In India

**Believed That Lord Willingdon Will Inaugurate Stiffer Policy**

Dondon, England.—Lord Willingdon takes up residence at the summer capital of India this week-end and it is generally believed he will inaugurate a policy somewhat stiffer than that of Lord Irwin.

Sir Geoffrey Demontmancy, governor of the Punjab, said recently that the Punjab government's policy of toleration had bred license, and would not be continued. The Punjab government, he said, would no longer stay their hand, but would deal properly with breaches of the law. The situation in the other Indian provinces is similar to that in Punjab.

## Prospects Good For Cattle Shipments

**Increased Demand From Great Britain Is Indicated**

Montreal.—Shipments of Canadian cattle to Great Britain are being well maintained and evidence indicates that there will be an increased demand from Great Britain as the season progresses. The first shipment from Montreal this season left April 30, aboard the "Manchester Commerce," taking 442 head, while seven other lots are booked for May and June. All shipments will average around 400 head.

## War Claims Heard

Ottawa, Ont.—A total of 457 cases have yet to be reported by the war claims commissioner, Errol McDougall, Montreal, of which 308 claims have already been heard, leaving a balance of 149 cases. If, however, jurisdiction is admitted in the claims arising out of the Armenian massacres, which were filed in 1920-21, there will be an additional 271 cases yet to be reported on.

## Canada-Mexico Auto Route

Mexico City.—Automobile travel from Canada to Mexico City will soon be possible when a road from here to Laredo is opened. Only a small link remains to be completed. While not yet surfaced, the highway provides a passable route for motor cars.

W. N. U. 1888

## Searching For Lost Explorer

**Ship With Airplane Carrying Provisions Has Left Iceland**

Copenhagen, Denmark.—A wireless message received at Reykjavik, Iceland, purporting to be from Augustine Courtauld, British scientist who is lost in Northern Greenland, stated: "Absolutely without provisions."

An aeroplane which has left Iceland with the Iceland inspection ship "Odin," will fly from the edge of the ice barrier to Tasioak and to Angmagsalik, searching for Courtauld en route. If the plane can find him it will drop provisions on the ice for his use.

He is believed to be somewhere in the vicinity of the station at which he was left to spend the winter and obtain meteorological data for use of British Arctic air route expedition. The site of this station has not been located thus far by rescue missions which have gone to Courtauld's aid.

## Preparing For Flight

**Bert Hinkler, Australia Flyer, Interviewed In Toronto**

Toronto, Ont.—Bert Hinkler, skilled Australian flyer, who set the first record for the London-Australia flight in a light machine in 1928, is now at a local airport here, and much conjecturing as to his immediate plans is being made by local airmen.

Interviewed by a local newspaper, Hinkler did not deny that he was going somewhere, but refused to discuss the matter of a flight.

It is believed, however, that he will suddenly decide to fly to South America, thence across the South Atlantic, or perhaps fly to Australia via Vancouver. A North Atlantic hop via the northern route is also suggested as a possibility.

## Armistice Day Is Now Fixed Date

**To Be Called Remembrance Day and Celebrated November 11**

Ottawa, Ont.—After a brief debate in private members' hour in Commons, the House endorsed a bill to change the name of "Armistice Day" to "Remembrance Day," and have it celebrated each year on November 11. At present it is celebrated on the Monday of the week in which November 11 falls jointly with Thanksgiving Day. The date of Thanksgiving Day will be fixed as it was some years ago by the government.

## Fishing Ships Forfeited

Ottawa, Ont.—Four ships of United States registry are condemned as forfeited to the Crown for fishing within Canadian territorial waters on the Pacific Coast, under a judgment handed down by the Supreme Court of Canada recently. The judgment confirms the findings of the local judge in admiralty at Victoria, B.C.

## Conference Will Decide

Ottawa, Ont.—The question whether a member of the House of Commons should or should not be compelled to vote in a division will be settled by a conference, whose personnel will comprise the leaders of all groups in the Commons. This was decided when Hon. C. H. Cahan, secretary of state, reverted to the matter.

## Would Change Naval Treaty Plan

Paris, France.—Difficulty in arriving at an agreement on the exact meaning of the Italo-French naval limitation treaty has led to an unofficial proposal from quarters close to the ministry of marine that France drop the treaty with Italy and each country make unilateral statements as to her naval needs.

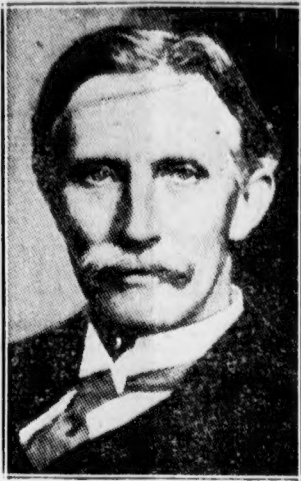

## Many Deported

Ottawa, Ont.—Of those who came to Canada under the 3,000-family scheme, 568 persons, including men, women and children have been deported. Hon. W. A. Gordon, Minister of Immigration and Mines, gave this reply in the House of Commons to a question by H. E. Spencer (U.F.A., Battle River.)

## President Of Canadian Press

Toronto, Ont.—M. E. Nichols, vice-president and managing director of The Winnipeg, Man., Tribune, was elected president of the Canadian Press, succeeding John Scott, managing director of The Toronto, Ont., Mail and Empire, who for personal reasons declined a third term.

## NOTED ECONOMIST

Sir George Paish, internationally-known economist, who said while in Montreal: "If the five-year plan succeeds it will mean the end of communism in Russia."

## Value Of Corn Imports

**Runs Into Millions and Duty May Be Demanded**

Ottawa, Ont.—Canada is importing, for purposes other than distillation, about 12,000,000 bushels of corn worth in excess of \$10,000,000 every year.

This information, given to the House of Commons in answer to a question some days ago, may be the basis of a demand for a duty on imported corn, which now enters the Dominion free.

The corn, brought from the United States, and even from the Argentine to some degree, is used for feeding livestock in the central provinces. It is the claim of some western M.P.'s that the eastern market for feed should be belong to prairie growers of barley and other coarse grains. A demand for the reduction of freight rates on these grains, when shipped for domestic consumption, has already been voiced. A stiff duty on foreign corn may now be asked.

## British Economist Gives Opinion On Depression

**Might End In Three Months Says Sir Josiah Stamp**

New York.—The end of the present economic depression in Canada and the United States will not be in sight before the end of the next three months, Sir Josiah Stamp, noted British economist, told the Canadian Press. The depression will probably come to an end in both countries simultaneously, he said, although recovery in the United States might be slightly more rapid than in Canada.

"I do not want to say the depression will end in three months," he said, "but I will say it can't end before that time. Some time ago I said it would not end before May. It has not ended and I now believe it cannot do so before the end of another three months."

## Fatal 'Plane Crash

**Two Lives Lost When Machine Crashes At Brandon**

Brandon, Man.—The first major plane crash in the history of Brandon brought death to two young airmen when their machine crashed from a height of 1,000 feet and burst into flames near the local aerodrome.

The victims were: William Clark, 21, owner of the plane, and son of Col. and Mrs. F. J. Clark, Brandon, and William Britten, 27, pilot of Wawanesa, Man.

Returning from a flight to Wawanesa, the airmen were preparing to land at the aerodrome when the plane swerved into a spin, exploded and burst into flames.

Like a rocket, it dived to earth, bringing instant death to the pilot and owner.

It was some time before the flaming wreckage could be approached by airport attendants, and the bodies, entangled in the debris, were charred beyond recognition. Nothing was left of the plane but the bars, twisted steel work.

Hundreds of persons flocked to the scene of the crash, and police had great difficulty in keeping the crowds away from the fire-straw wreckage.

## Steamer Beothic Will Make Annual Expedition

**May Again Make Attempt To Reach Winter Harbor, Melville Island**

Ottawa, Ont.—The annual expedition of the steamer "Beothic" to the Canadian Arctic archipelago will be carried out as usual this year by officials of the Northwest Territories branch of the Department of Interior and the Royal Canadian Mounted Police. The "Beothic" will leave for the Arctic about the end of July and visit all the northern police posts as well as the various posts where "N.W.T." men are stationed.

It is understood there will be another attempt to reach Winter Harbor, Melville Island, to inspect the cache there. This cache was put in over 20 years ago, and while it has been visited by travellers with dog teams, a boat has not called in there since it was established.

Last year an attempt to reach the cache was unsuccessful, due to ice conditions.

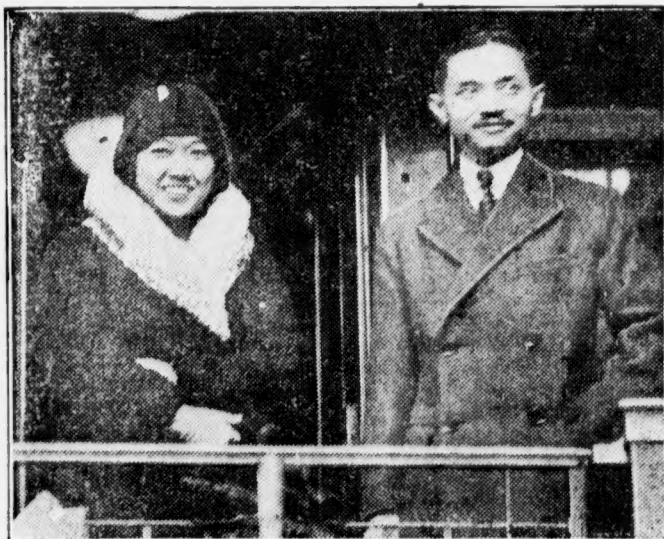

## Princes Welcomed Home

**Prince Of Wales and Prince George End Long Journey**

Windsor, England.—The Prince of Wales and his brother, Prince George, ending an 18,000-mile trade mission to South America, returned to the family hearth and were joyfully welcomed by the King and Queen.

Their arrival at Windsor Castle from Paris after an absence of three and a half months was the occasion for a happy family reunion. Their parents and the Duchess of York, greeted them enthusiastically. Princess Elizabeth, their niece, threw her arms about their necks and gave them each a loud kiss.

## King and Queen of Siam

King Pradjhipok and Queen Rambai-Barni, monarchs of Siam, posed briefly for cameramen aboard their special Canadian Pacific train at Vancouver before starting their trip to New York via the Canadian Rockies and Chicago. Indisposed when the Canadian Pacific liner "Empress of Japan" arrived at Victoria and Vancouver after a record-breaking voyage from Yokohama, His Majesty King Pradjhipok was unable to receive the official delegation of welcome. His first public appearance was when he walked from the royal suite aboard the big white liner to the waiting royal train parked beside the ship.

## UNEMPLOYMENT INSURANCE PLAN IS FORTHCOMING

Ottawa, Ont.—The government hopes to submit to parliament "at the earliest possible moment" legislation providing for some form of unemployment insurance. A statement to this effect was made by Premier R. B. Bennett in the House of Commons.

The prime minister, however, made it clear that such legislation can only be submitted after careful inquiry and the gathering of the fullest information. The department of finance will not act without preliminary investigation. "That course of action would spell disaster; it would bring suffering, not happiness, to those concerned."

The prime minister made one definite declaration. He would never support a system of non-contributory insurance. Canada could not stand a system such as that in operation in Great Britain, with its tremendous drain on the exchequer.

The question of unemployment insurance came before the House in the form of a motion placed on the order paper by A. A. Heaps, Labor member for Winnipeg North. It called upon the government to "take into consideration the immediate establishment of a federal system of insurance against unemployment, sickness and invalidity." He submitted his proposal not as a cure for unemployment, but merely as a palliative, said the Labor member at the outset of his speech. The federal government should "give the lead" to the provinces in such legislation.

The word "immediate" should be deleted from the resolution, suggested Mr. Bennett, and the word "contributory" be included. It was impossible for the government to deal immediately with a matter which might require months of research and actuarial work; also, Canada was about to take a census, and the information then gathered would be of great value in reaching conclusions as to the nature of the proposed scheme. Co-operation of the provinces would be necessary.

Support of the motion was voiced by Mr. King. Modern conditions, involving the use of invention, resulted in men being thrown out of work, and countries were faced with the necessity of providing unemployment relief or unemployment insurance. He favored the latter. If a Dominion old age pensions scheme could be devised, he saw no reason why a scheme of unemployment relief should not also be evolved.

## Grain Probe Report

**Report Containing 40,000 Words To Be Tabled In House Of Commons**

New York, N.Y.—The work of the Royal Grain Commission, appointed by the Canadian government to decide whether or not trading in grain futures is injurious to the interests of the producer, came to an end as its members signed their report aboard the "Mauretania," just before she sailed for England bearing Sir Josiah Stamp, noted economist, who served as chairman of the commission.

The report, which, members said, is about 40,000 words in length will be taken to Ottawa by L. B. Pearson, secretary to the commission, and, it is expected, will soon be tabled in the House of Commons.

## Thresh Last Year's Crop

Saskatoon, Sask.—Threshing will be completed in the territory around Prince Albert this week, according to T. F. Mollard, travelling superintendent for the Pool Elevators, who has returned from an inspection trip in that area. Due to wet weather last fall and the October snow storm a considerable quantity of grain remained in the stook. This grain has wintered well and is for the most part grading straight.

## Saskatchewan Musical Festival

Moose Jaw, Sask.—Entries are being received in large numbers for the Saskatchewan Musical Festival, which will be held here June 1, 2 and 3, it was learned recently from local festival officials. While no definite figures can be quoted at the present time, the entries are stated to be quite up to expectations.

**SUPPORT CHAUTAUQUA**

The dates of the Carbon Chautauqua  
have been set as June 15, 16, 17 and 18.  
This year, as in years gone past, a  
number of citizens have signed the  
guarantee of \$925 to bring Chautauqua  
to Carbon in the interests of the com-  
munity. Therefore, with the existing  
depression, it means that the full co-  
operation of the people will be needed  
to put over this event with flying col-  
ors.

Should the Carbon Chautauqua be  
a failure this year it will probably  
mean that never again will the citizens  
of the town and district bring in this  
entertainment for you over their sig-  
natures.

This year no doubt most of us will  
not be able to afford a holiday away  
from home. The cost will be the de-  
ciding factor. However, we all can  
and should make it our ambition to  
afford to attend the Chautauqua in  
Carbon. There is no one who can  
honestly say that the Chautauqua pro-  
grammes are not worth the money, be-  
cause they are. In fact the seven pro-  
grammes presented at Chautauqua for  
the sum of \$2.50 is a bargain that is  
hard to beat in any entertainment or  
other commodity.

The Carbon Chautauqua is still five

weeks away, but it is not too early to  
begin saving your money to take in  
the event. There is no doubt in our  
opinion that if any person puts his  
mind to ways and means of possessing  
a season's ticket to Chautauqua, that  
his or her desire will become a reality.

Put your shoulder to the wheel; for-  
get your worries and troubles for a  
week and ease your mind with a little  
wholesome entertainment. Plan to at-

**THE PRINTER**

It may be sad, but still 'tis true,  
There's one thing all of us humans do,  
And that is, blame the printer.  
He does his best, without our help,  
For all we do is stand and yelp,  
Then cuss, and blame the printer.

We write our manuscript by pen  
To read it is beyond our ken,  
Yet we expect the printer  
To dope it out and get it right.  
We think not of his time or sight;  
If wrong—we blame the printer.

We hold our stuff until the last,  
Then try to rush it through so fast,  
The printer gets snowed under,  
But still we camp upon his trail,  
And prod him on with woeful tale,  
Or rant and roar like thunder.

He shoots it through, the proof we get;  
Hell's bells! the job is not right yet.  
We chop that proof to splinters.  
It takes two days before he knows  
Just what each hieroglyphic shows—  
A dumb lot are those printers.

The job's delivered. Some relief—  
To know we're through with rush and  
grief.

We ought to thank the printer.  
But no! The poor gink's out of luck—  
He overcharged us one whole buck.  
Once more we damn the printer.

**BIRDS**

(O.S.A. News)

Being somewhat interested in bird  
life it might be interesting if we pass  
on to others what has been seen  
around the O.S.A. from January to the  
time of writing. A pair of very pretty  
birds were seen this morning which  
attracted our attention. The color was  
predominantly lemon yellow, with  
black and a patch of white on the  
wing; there was also a yellowish bar  
on the forehead. This we presumed  
was the male, as the other one near  
it, when on the wing, was duller in  
color but about the same size. The  
name of the bird, according to authori-  
ties, is the Western Evening Grosbeak.  
Early in March a group of birds were  
seen busy pecking at the miniature  
fruit of the Siberian Crab. They were,  
apparently, quite nervous and had to  
be watched closely for markings. The  
wings were white with a slight yel-  
lowness, the tail bore a distinct bar  
of yellow. This, we understand, is the  
Bohemian Waxwing. Another welcome  
little visitor was the well known Blue-  
bird. This one was what might be  
termed "a solid light sky blue" and  
appeared to be lighter on the breast  
than other parts. We believe this is  
the mountain bluebird.

A rather common bird during the  
summertime was seen whinging its way  
over the farm. This bird was a large  
black one with rather distinct heavy  
flapping of the wings. It is known as  
the Northwestern Crow.

A welcome visitor, and harbinger of  
spring, was seen looking for food on  
the campus. In color this particular  
one had the familiar red breast, dark  
greyish brown on the back, and well  
known as the western robin. Last, but  
not least in number, there is the com-  
mon Sparrow which we always have  
with us whether summer or winter,  
cold or heat.

Another common, and perhaps one of  
the prettiest singers of western birds  
is the Meadowlark. Its jubilant song  
can be heard in early morning and  
and evening, and one never tires of  
its appeal for life through its quaint  
song.

**Canada Must Win  
World Championships**

World Championships in 1932 will be won by farmers  
who recognize that the cleanest and best quality  
seed with the most careful cultivation are essential  
to the production of exhibition grain. While it is  
recognized that these things should apply to the  
whole crop area, concentration upon a small plot is  
the best plan for securing an exhibit sample. If  
such a plot is subjected to extra preparation—with  
more care probably than it is possible to devote to  
the whole crop area—and sown to the very choicest  
seed it will not only provide good quality foundation  
stock for next spring's seeding, but a winning  
sample for exhibition at

**The World's  
Grain Exhibition  
and Conference**

REGINA, JULY 25 to AUG. 6, 1932

This great World Exhibition and Conference is organized  
for the benefit of Canadian farmers, for the advancement of  
Canadian agriculture, to demonstrate the superiority of Cana-  
dian field crops, to further stimulate a world-wide demand  
for Canadian crop products—Canada against all  
competitors must win the major awards.

**\$200,000 in Cash Prizes**

\$2,500 a first prize for 50 lbs. of wheat; 30 lbs.  
of oats  
\$1,500 for 40 lbs. of barley; 50 lbs. of rye  
\$ 800 for 10 ears of corn  
\$ 300 for 30 lbs. of peas; 30 lbs. of flax; 20 lbs.  
of clover

All provincial committees have special literature for helping  
intending exhibitors. For this information write the com-  
mittee nearest you. ONTARIO: J. A. Carroll, Dept. of Agri-  
culture, Toronto; QUEBEC: Paul Mehu, Dept. of Agri-

CHAPTER XVI—Continued.

"In that case he needn't know anything about the—'circumstances.' I haven't told him. I confided in Mrs. Maxwell because I just had to talk to someone; but if Nick knew, he might refuse to go. And you mustn't misunderstand me, either. Nick's the last one not to be glad about such news; but just now he isn't well, and the thought of the expenses to come would be a drop too much. If I'm sick as I was when little Nick was born it will mean putting us in debt again. But I shan't be. I can't be, that's all; but somehow I feel that everything will be all right. I meant not to tell Nick till I had to; and if he goes away at once he needn't know till he comes home. I'm tremendously grateful to you, Mr. Maxwell. It will be a dream come true for him to see the tropics."

John Maxwell met her eyes with a look of unveiled admiration and affection.

"You're a plucky girl, Gay."

She laughed, tremulously.

"Oh, no I'm not! Inside I'm just despairing at the thought of having him away just now; but when we were on our honeymoon Uncle Sim gave me some advice that I've never forgotten. He said: 'Don't tie him too close to yer apron strings. Give him plenty o' rope to run on.' I think he understood Nick better than I did then. He was just a—well, a kid when he married me, Mr. Maxwell, and I've brought him a lot of worries. I don't know that he's ever even felt like complaining; but I know there've

been times when he craved a taste of the freedom he's never really had. That's why I'm so glad to let him go—and why he mustn't know what I'm facing. The trip will make a boy of him again—and that's the way I want to keep him. A nature like Nick's ought not to be laden down with cares."

"My child, Nick's cares have been the making of him. What we must do is to lighten them now and then, and give that vagabond spirit of his a chance to roam. And now we've settled his difficulties, I've something else to speak of. You ought not to stay alone in this old house. Mrs. Maxwell wants you to bring the babies and come to us. It will seem good to have some of the empty rooms in use. That's the worst of a big family, Gay. The children leave such a hole when they fly away."

Gay lifted eyes that were very bright.

"That's beautiful of you both; but really, there's no place like home when one doesn't feel quite well. Perhaps Uncle Sim would come and stay with me. I'm sure he would; and he's a real help with the children."

He's getting old, Gay. Wouldn't he add to your cares?"

"Not a bit. Besides, his unfailing good spirits are a tonic. Mrs. Maxwell will understand. I know. It's hard visiting with babies—even such dear friends as you. I'll write Uncle Sim today."

"Well," said John Maxwell, rising, "you must do what makes you happiest, my dear. But our house is always open to you and yours. You won't forget that?"

"I shall never forget any of your kindnesses," Gay answered. "I've stored them all safely in my house of memories. Do tell Nick as soon as you reach the bank, Mr. Maxwell. I can't wait for him to know what's in store for him."

A rejuvenated Nick came home that night. He caught his wife in a bear-like hug, and frolicked with his boys as he hadn't for many a week.

"I can hardly believe it!" he said when the babies were in bed—the dishes washed—and he and Gay were seated before the fire. "I've been feeling so seedy that this trip is a regular god-send. You know how crazy I've been to see Jamaica ever since old Bennington told me so much about it; and to have it come like this—not costing us a penny—Well, it's one of the things that seem too good to be true. If only I could take you with me—"

His eyes looked troubled, and Gay smiled.

"You'll be freer without me, dear. You can pretend that you're starting off as you did on that May morning so long ago, before your kind heart took pity on the lone, lorn damsel you were leaving."

"She seems mighty contented to be left this time," he replied; then catching a wistful look in her eyes he added: "Gay, is it mean of me to go without you?"

She smiled.

"What a ridiculous idea, since I couldn't go in any case. And you mustn't hurry back, Nick. You must see all you can because you may never have such a chance again. All I ask is that you write by every boat. I don't pretend that I shan't miss you, for you know better; but to get your letters and hear you tell about it will be almost as good as taking the trip myself."

Nick leaned forward to straighten a crumpling log, and gazed into the fire for a long moment.

"It'll be spring when I get back," he said dreamily. "Perhaps the apple trees will be in bloom. I never see 'em, dear, without remembering the morning we started out together. You've been a bully good comrade along the way, Gay. When I stop to think about it I almost hate to take this detour without you."

"Then don't think about it," she smiled, "or if you must, just remember that I'm keeping in the straight and narrow way, and will be there to meet you at the cross-roads."

She laughed at her own fancies, and added apologetically: "I seem to be waxing poetical. It's the result of our prospective parting. If you stay too long I may take to writing verses to you!"

"I'd make a rather solid target for the muse," Nick answered. "I can't imagine getting practical about anything so substantial." Then he broke off suddenly, his eyes shining: "Gay! do you realize where I'll be a month from now? I'm dizzy at the thought!"

And ten days later—a cold, raw

after PLAYTIME

GIVE them a glass of Borden's Chocolate Malted Milk when they come in from school or play.

## Borden's

CHOCOLATE  
MALTED  
MILK

first of March,—armed with a suitcase, innumerable snapshots of his wife and babies, and his old, boyish desire to "conquer the universe," Nick stood on the deck of the big, white fruit steamer, and watched the Statue of Liberty drop behind the horizon.

"I wonder," he mused aloud, "I can't help wondering, what adventures I'll live through before I see the good old U.S.A. again."

He turned at a light touch upon his arm.

Angela Halliday stood beside him.

### CHAPTER XVII.

There is no place like the deck of a steamer for forcing the flower of intimacy. Angela Halliday was alone, bound for Port Antonio where she was to join the Myers. Nick also being alone, it was not unnatural that the greater part of their time was spent together. Both were good sailors, and on the days when most of the passengers were in their berths, they enjoyed a "solitude a deux" in which their friendship ripened quickly.

Angela had never met his type before, and the novelty pleased her. Besides she had not forgotten her husband's taunt regarding this special victim.

A word in a note from Julie, written in thanks for a discarded sweater, had given news of Nick's proposed trip to the tropics. A little clever detective work as to possible boats, and her plans were made. The fact that the Myers were at Port Antonio, made everything plausible. A hurried trip to New York was no uncommon thing for Angela to indulge in; and her unsuspecting husband had no inkling of her plans until she was safely on the water. Angela smiled at the thought of his baffled rage, when he should receive her note.

To Nick the meeting was simply an amazing coincidence. He wrote to Gay:

You could have knocked me down with a feather when I saw her; but really, it's rather pleasant having a friend aboard—even one of whom my wife doesn't approve! I wonder if you and I will ever think alike upon that subject. I feel sure there's a tragedy somewhere in the background; yet Halliday is surely no boulder. His devotion to little Martha is something wonderful. I don't believe he's missed coming to see her every week this entire winter—but his wife's not happy with him. I don't know which of 'em I pity most. Which would be worst, Gay, not to be happy yourself, or to know you'd failed in making another happy?

So it was in a spirit of pity that Nick drank in Angela Halliday's skillful draughts. She rarely mentioned her husband, and he got the impression that the subject was a painful

## PUTNAM'S

## The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE—

There we stood before General Lu, wondering what was going to happen next. Scottie, bristling with anger and ready to fight at the drop of a hat. The interpreter scowled white, or rather, scared lemon yellow—and myself anxious and worried for fear that General Lu would refuse to give us our pass to the Chinese front.

Fortunately General Lu was too great a man to bother much about dignity. Without even a word of comment on Scottie's absurd attack, he sat down and wrote quickly on a sheet of paper, to which he affixed a bright green seal.

Five minutes later we left the palace with a pass that gave us freedom to go anywhere we pleased.

Early next morning we took off in our plane for Lih-ho—a little town where the fighting was in full progress. Soon the country below showed the ravages of war. Buildings were wrecked by shell-fire, bridges were down at the rivers, and the ground was so rough that we almost crashed at our first landing.

Leaving our plane well back from the battle front, we took a road leading up to the lines. The air was damp and foggy, and the rumble of the guns seemed muffled under the heavy grey sky. Bullet-scarred walls stood bleak and white, and now and then a tree, with the wood torn into ribbons, showed the spite of high explosives.

Suddenly we noticed a group of soldiers, off duty, grouped around some object tied to a tree. Coming near we heard a loud and complicated din—moaning, groaning and gibbering enough to make your hair stand on end. To our horror, we found that the soldiers had caught a few of the enemy, and tied them up to a large branch by their wrists, so their feet were several inches off the ground. Of course, it must have been fearfully uncomfortable, but the soldiers only laughed and jeered.

"Come on Scottie," I said, "Let's bust up this party."

Punching and poking my way through the ring I stood beside the prisoners. The soldiers, of course, did not take this

treatment too kindly, and began to whisper among themselves and finger their rifles. Then I took out General Lu's pass. Luckily no one could read it—but I pointed to the bright green official seal and made gestures and faces that must have convinced those Chinese soldiers that dire calamity would befall any man who interfered.

Taking out my knife, I cut the captives down, and automatic pistol in hand I shoved them through the ring of soldiers who were too surprised to resist. We worked quickly. Any moment the men might change their minds and make things hot for us.

"Herd those prisoners into that house," I said to Scottie, pointing to a house which remained standing. In fact, it afterwards proved to be the headquarters of the Colonel in charge. Scottie needed no second invitation—with a fierce growl he lunged for the ankles of the three Chinese, and they covered the distance in no time at all.

Then the soldiers suddenly woke up.

Several fired shots, and others ran toward us with their bayonets. I ran to the door. This was guarded by a sentry. He made a stab at me but missed, so I bowled him over and turned just in time to see two more figures rushing toward me. There was no time to think. Hiding behind the door, I hit each as hard as I could as he jumped over the sill, and scored two knock outs.

Then as my eyes became accustomed to the gloom of the house, I looked more carefully, and discovered to my dismay that one man was my interpreter, and the other no less than the Colonel himself.

Fortunately the Colonel revolved in a few moments, otherwise we would have been in a bad fix, as everyone was running toward the house shooting and yelling. Sitting up, he fairly scowled some orders in Chinese. Instantly the hubbub ceased.

The Colonel turned to me. Quite evidently he hadn't the slightest idea what happened.

(To Be Continued.)

## Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. - - - Pound and half pound tins at your grocers

one—something that hurt too deeply to be touched upon. Thus her care-free laughter struck him as both fine and pitiful. He longed to tell her that he understood and sympathized, but something intangible, possibly the memory of Gay's warning, kept back the words.

(To Be Continued.)

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence, who is infested with worms can take this preparation without a qualm of the stomach, and will find in it a sure relief and a full protection from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

### Little Helps For This Week

"To him that overcometh will I grant to sit with me in my throne."—Revelation iii. 21.

Heaven is not reached by a single bound; But we build the ladder by which we rise From the lowly earth to the vaulted skies And we mount to its summit round by round.

We rise by the things that are under our feet, By what we have mastered in greed and gain, By the pride deposed and the passion slain, And the vanquished ill we hourly meet.

—John G. Holland.

Our appointed life-way is an ascending path upward, if we would have it onward. There are obstacles on it, mercifully placed there to train and exercise our best powers of mind and heart; none of them insurmountable, though some of them are steep and rough in the climbing. It is for us to choose whether we will stumble on them, crawl round them, or surmount them; and our destiny is contingent on our choice.

—Andrew P. Peabody.

### Forest Protection

With the first fire protection patrol made, the war against the menace that annually threatens the forest resources of Saskatchewan is on. Construction work on the four radio-equipped lookout towers at Thunder Mountain, Fishing Lakes, Booman and Waskesieu is now underway and radio equipment for the stations has been purchased.

Practically all threatened strikes in Norway last year were settled by arbitration.

### Studying Business Conditions

#### Party Of British Capitalists Making Tour Of Canada

A party of British capitalists, members of the Federation of British Industries, were among the passengers arriving at Quebec from England on the "Empress of France." They met Hon. H. H. Stevens, Minister of Trade and Commerce, in Montreal, and will make a tour of Canada to study business conditions and opportunities. The party was composed of Col. Sir James Lithgow, Bart., Sir Arthur Duckham and Moir Mackenzie.

Douglas' Egyptian Liniment is unrivalled for speedy relief in muscular rheumatism, lame back, inflammation, burns and felons.

More than 220,000 men will be employed on Italy's public works project.

## If baby has COLIC

CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

## Fletcher's CASTORIA

## Weak After Operation

"After having an operation, I was very miserable, weak, nervous and very near unfit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spells any more, the pains have left me and my nerves are much better. I feel safe in saying Lydia E. Pinkham's medicines have helped me wonderfully."—Mrs. Wm. H. Beechteller, Box 143, Port Colborne, Ontario.

## TOWN & COUNTY Personalographs

Mrs. George Oliphant returned home  
Sunday after spending a couple of  
weeks in Calgary.

Mrs. Jas. Ramsay was a Calgary vi-  
sitor last Friday.

The Misses Mabel Ramsay and Molly  
Laird spent the week end at their  
homes in Carbon. They returned to  
Calgary on Sunday.

The Wednesday half holidays com-  
menced yesterday and housewives are  
reminded again that all stores close  
at 1 p.m. on that day.

Mrs. Rochester and her sister, Miss  
Della Hoffer, came up from East  
Coulee on Sunday. Mr. and Mrs. Ro-  
chester have moved back to Carbon  
and have taken up residence in their  
house.

Mrs. A. McLeod and infant son mo-  
tored home from Calgary on Saturday  
with Mrs. McLeod's brother-in-law,  
Mr. W. McLeod.

Mr. and Mrs. R. C. Barr have moved  
over the Carbon Bakery this week.

Work is starting on the golf course  
this week and the greens are to be  
oiled and sanded this spring.

Ingraham Hart is quite ill in the  
Calgary General hospital with pneu-  
monia. The Hart family motored in to  
see him on Saturday.

Mr. and Mrs. Jack Mansley moved  
in to one of Hoading's houses Thurs-  
day last.

## CARD OF THANKS

**THE CHRONICLE**

Jas. Baird is having a foundation  
put under the house formerly occupied  
by R.C. Barr.

Mr. and Mrs. H. Birch of Cluny were  
Carbon visitors on Monday.

Rev. L. D. Batchelor is supposed to  
move from Acme to Carbon this week.

A little moisture fell in the district  
over the week end. The days are warm  
again.

"Just think!" exclaimed Cecil the  
romantic, "A few words mumbled over  
your head and you're married."

"Yes," agreed Bill, the cynical. "And  
a few words mumbled in your sleep  
and you're divorced."

A stout woman asked her physician  
what she should do to reduce.

"Take the proper kind of exercises,"  
the physician replied.

"What kind do you recommend?" she  
asked.

"Push yourself away from the table  
three times daily," he replied.

## DAMAGE FROM CUTWORMS THREATENED THIS YEAR

It is expected that serious damage  
will result this year from cut worms,  
in some sections of Alberta, and the  
district of Carbon although not out-  
lined as one of the probable localities  
where damage may result, it just bor-  
ders on infected areas and the farm-  
ers should take every precaution. The  
following by Prof. E. H. Strickland, of  
the University of Alberta, should be of  
vital interest to every farmer in the  
province of Alberta:

Appearance—Color, slate grey. No  
markings on body.

Area where damage is almost sure  
to occur—Nearly all of the province  
to the south and east of Stettler, par-  
ticularly along the Red Deer river and  
the Goose Lake railroad line. No trou-  
ble from this cutworm is anticipated  
to the north or west of Stettler, or in  
the western half of southern Alberta.

Crops most susceptible to attack—  
All grain crops. Broad-leaved plants,  
such as garden produce, clover, etc.,  
are not eaten very freely by this cut-  
worm.

Control—Practically nothing can be  
done to prevent all of the eggs that  
were laid last fall from hatching this  
spring. Deep plowing may destroy a  
few of them, but this is very uncer-  
tain. In all fields in which the moths  
laid many eggs last fall cutworms will  
be present in destructive numbers this  
spring and summer.

Poisoned bait is practically useless  
for the control of this cut worm. Do  
not waste good money in scattering it  
over large infested areas.

Preventing egg-laying—It has been  
definitely shown that the moths will  
not lay their eggs in soil that is crust-  
ed on the surface in August and Sept-  
ember. Nearly all have been laid in  
fields that had loose dusty surfaces  
during these months last year. It is  
dangerous to seed such fields with  
wheat this spring. If they are heavily  
infested with eggs the crop is certain  
to be destroyed.

Test Stripping—If possible, summer  
fallow these fields this year, but if you  
decide to seed them to wheat we would  
suggest that, as soon as possible, you  
seed a single drill width of wheat di-  
agonally across each of them. Then seed  
your "safe" fields. By the middle of  
May, or as soon as you hear of cut-  
worm damage in your district, exam-  
ine your test strip. If it shows signs  
of heavy cutworm feeding don't waste  
good seed by seeding the entire field.  
If, on the other hand, it shows no  
signs of damage it is not too late at  
this date to seed wheat.

Re-seeding—Don't re-seed destroyed  
fields, or seed fields known to be infest-  
ed, till the cutworms are full grown  
and are about one and one-half inches  
long. This usually is not before June  
20. In all probability oats will have to  
be seeded at this late date.

Summer-fallowing—Arrange your  
summer-fallowing program for this  
year in such a manner that you can  
have all weed growth destroyed by the  
end of July, so that you can keep en-  
tirely out of the fields throughout Au-  
gust and September in order to safe-  
guard your 1932 crops.
